REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art of record are Griffith et al (U.S. 6,358,642), Bregoli et al (U.S.5,468,573) and JP2000-317531.

Griffith et al. teach a fuel cell, which includes a separator comprising a current collector with edges (compare to "a circumferential portion", as instantly recited), formed by stamping a sheet of metal (col.4, lines 7-50). Griffith et al. fail to anticipate or suggest fairly a separator, wherein a rib or any other structural element is formed within the edge portion of the current collector.

Bregoli et al. teach fuel cell, wherein a current collector comprises grooved passages and formed by stamping a metal plate, the said collector being in contact with anode plate. Bregoli et al. fail to anticipate or suggest fairly a circumferential portion, surrounding the current collector, the said portion having a rib or any other structural element.

JP'531 teaches fuel cell, which includes metal press stamped current collector having circumference with protrusions to inhibit the generation of curvature resulting from elastic recovery. JP'531 fail to anticipate or suggest fairly a current collector, which possesses grooved passages, the said collector is formed by pressing a metal plate in such a way that a circumferential portion with the rib on the periphery of current collector is also formed.

No other prior art that anticipates or suggests fairly a fuel cell, which includes a current collector with grooved passages, the said collector having a circumferential portion with a rib, wherein the said current collector with adjacent circumferential portion with the rib appears as the solid unit, which is formed by pressing a single sheet of metal, has been located as of the date of this office action. Therefore, claims 1-3 are allowed over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Kornakov whose telephone number is (571) 272-1303. The examiner can normally be reached on 9:00am - 5:30pm.
